U.S. House IA-01 (#IA01): voting history of poll respondents

Polls conducted by GOTV Polling. Paid for and Authorized by Results PAC.

Sample: 226 completed respondents answered the U.S. House IA-01 question (published topline n). Margin of error plus or minus 6.7 points at 95% confidence (including the weighting design effect). Weighted to recalled 2024 presidential vote, the same method as the published toplines. Voting history comes from the voter file record matched to each respondent (226 of 226 matched). All numbers are polling aggregates. Any group with fewer than 30 respondents is held back. Subgroup margins of error are larger than the topline.

Published topline: Mariannette Miller-Meeks 51.8%, Christina Bohannan 45.3%, Undecided 2.9%.

Who answered: voting history profile

Every respondent voted in the 2018, 2020, 2022 and 2024 general elections (all of the last four). These are high-turnout voters, not all registered voters, so these results describe the most reliable part of the electorate.

New vs habitual: voters who did not vote in the 2016 general (newer voters) number under 30 and are held back; everyone else is a long-run habitual voter. A new-voter comparison is not possible from this sample.

Party registration by primary history:

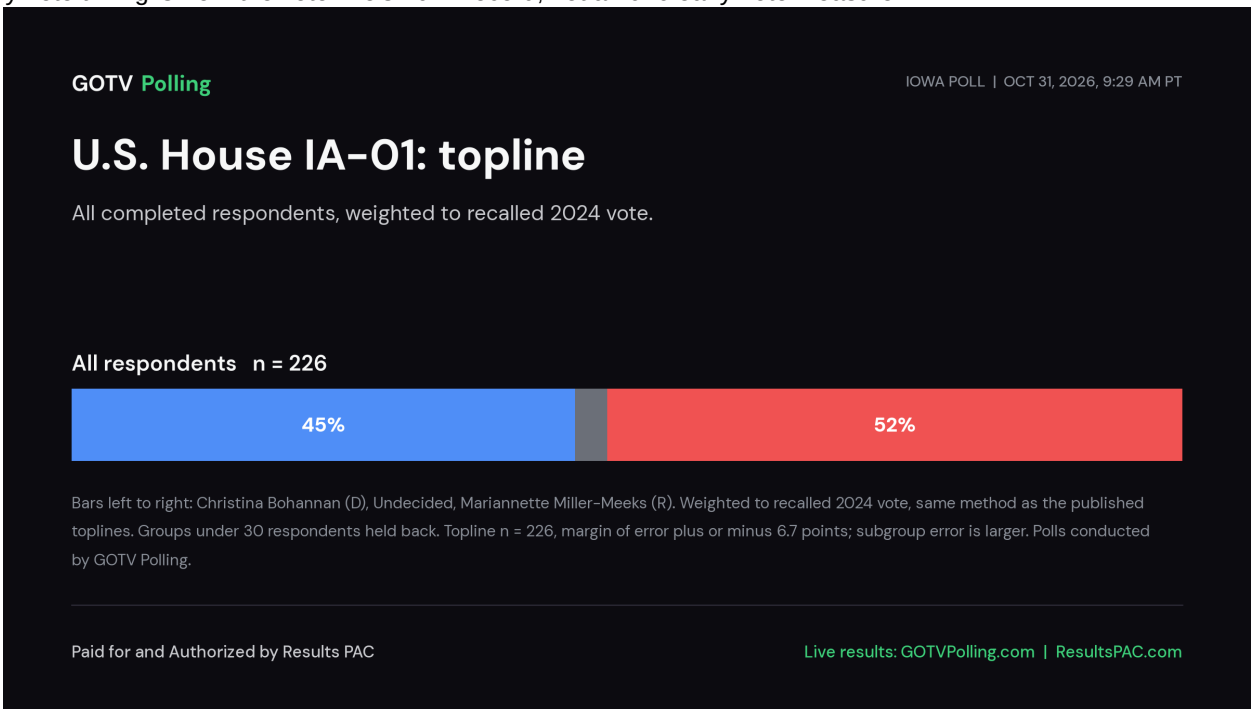

Group	n	Christina Bohannan	Mariannette Miller-Meeks	Undecided
Republican, all 5 primaries	49	7.6%	89.0%	3.4%
Republican, fewer than 5 primaries	51	5.8%	90.9%	3.4%
Democratic, all 5 primaries	83	90.6%	6.0%	3.5%
Democratic, fewer than 5 primaries	41	100.0%	0.0%	0.0%
Other / no party, all 5 primaries	under 30	held back	held back	held back

What it means

Margin among voters in all 5 primaries: Bohannan +6.4; among those in 2 or 3 of 5: Miller-Meeks +38.9.
Margin among voters who voted early 2+ weeks out in 2024: Bohannan +25.6; among Election Day voters: Miller-Meeks +40.0.
Within each party support barely moves (Republicans 89% and 91% Miller-Meeks, Democrats 91% and 100% Bohannan), so the gap is mostly party mix.
Because every respondent is a high-turnout voter, read differences between voting-history groups as differences within the most reliable part of the electorate, not as a turnout model.
Party and primary history overlap strongly; differences by history group are largely party composition.

Caveats

Held back (under 30): Other / no party, all 5 primaries.
Early-vote timing is from the voter file's 2024 record, not a 2026 early-vote measure.
