U.S. Senate (#IASEN): voting history of poll respondents

Polls conducted by GOTV Polling. Paid for and Authorized by Results PAC.

Sample: 930 completed respondents answered the U.S. Senate question (published topline n). Margin of error plus or minus 3.4 points at 95% confidence (including the weighting design effect). Weighted to recalled 2024 presidential vote, the same method as the published toplines. Voting history comes from the voter file record matched to each respondent (930 of 930 matched). All numbers are polling aggregates. Any group with fewer than 30 respondents is held back. Subgroup margins of error are larger than the topline.

Published topline: Josh Turek 44.3%, Ashley Hinson 53.7%, Undecided 2.0%.

Who answered: voting history profile

Every respondent voted in the 2018, 2020, 2022 and 2024 general elections (all of the last four). These are high-turnout voters, not all registered voters, so these results describe the most reliable part of the electorate.

New vs habitual: 35 respondents did not vote in the 2016 general; everyone else is a long-run habitual voter. A new-voter comparison is not possible from this sample.

Primary participation, 2018 to 2026 (of 5):

Group	Respondents	Share
All 5 primaries	561	60%
4 of 5 primaries	234	25%
2 or 3 of 5 primaries	135	15%

2024 general, how they voted:

Group	Respondents	Share
Early, 2+ weeks out	282	30%
Early, final 2 weeks	391	42%
Election Day (no early record)	257	28%

Voter-file vote frequency score:

Group	Respondents	Share
Vote frequency 8 (highest)	561	60%
Vote frequency 7	234	25%
Vote frequency 5 to 6	135	15%

Party registration by primary history:

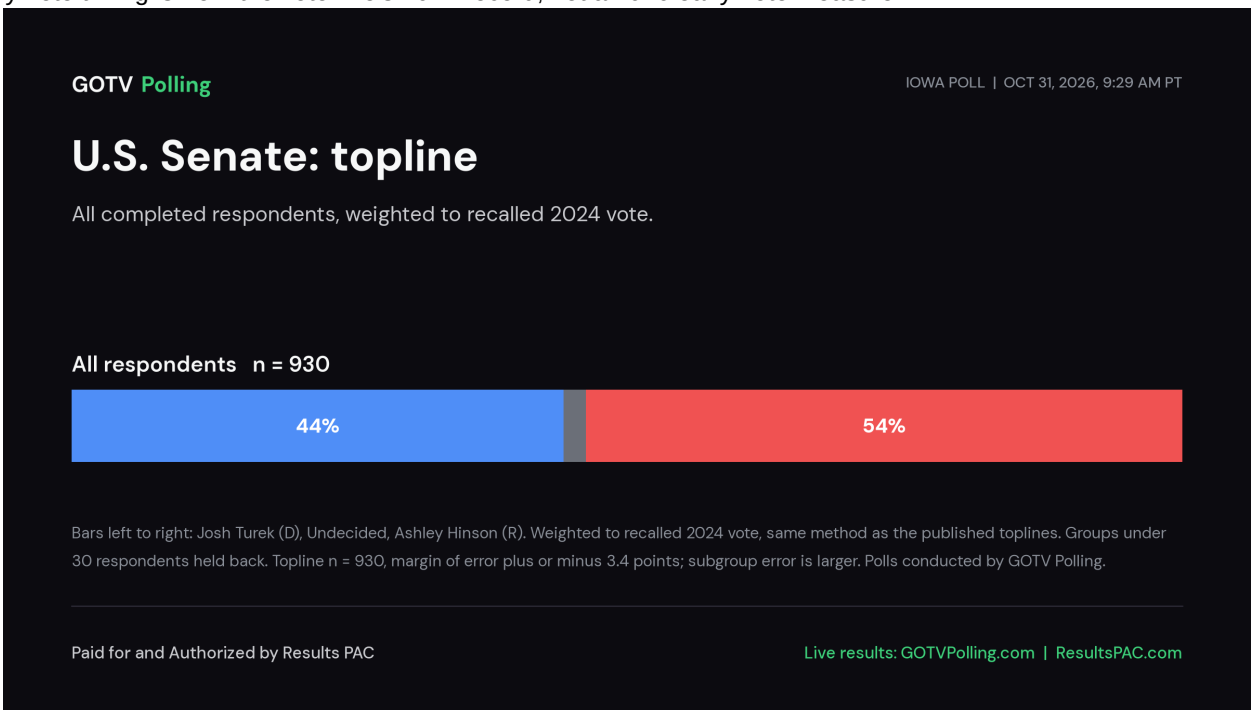

Group	n	Josh Turek	Ashley Hinson	Undecided
Republican, all 5 primaries	170	8.9%	89.8%	1.3%
Republican, fewer than 5 primaries	224	6.8%	90.2%	3.0%
Democratic, all 5 primaries	385	93.7%	4.2%	2.1%
Democratic, fewer than 5 primaries	143	94.8%	4.5%	0.7%
Other / no party, all 5 primaries	under 30	held back	held back	held back
Other / no party, fewer than 5 primaries	under 30	held back	held back	held back

What it means

Margin among voters in all 5 primaries: Turek +13.4; among those in 2 or 3 of 5: Hinson +45.2.
Margin among voters who voted early 2+ weeks out in 2024: Turek +8.2; among Election Day voters: Hinson +27.8.
Within each party support barely moves (Republicans 90% and 90% Hinson, Democrats 94% and 95% Turek), so the gap is mostly party mix.
Because every respondent is a high-turnout voter, read differences between voting-history groups as differences within the most reliable part of the electorate, not as a turnout model.
Party and primary history overlap strongly; differences by history group are largely party composition.

Caveats

Held back (under 30): Other / no party, all 5 primaries, Other / no party, fewer than 5 primaries.
Early-vote timing is from the voter file's 2024 record, not a 2026 early-vote measure.
